CAESAREA, Israel – November 5, 2015 – Mazor Robotics Ltd. (TASE: MZOR; NASDAQGM: MZOR), a developer of innovative guidance systems and complementary products, reported revenue of \$5.0 million for the third quarter ended September 30, 2015 compared to \$6.1 million the year-ago third quarter. As previously reported on October 6, 2015, during the third quarter the Company sold three Renaissance systems, including the first systems installed in the New York City metropolitan market.

“The strategic importance of the two Renaissance system sales in the New York City metropolitan market is significant to our opportunities for growth,” commented Ori Hadomi, Mazor’s Chief Executive Officer. “These are leading academic institutions and their utilization of the systems will help us build greater awareness in the NYC area and in other large metropolitan areas we are seeking to penetrate. As we approach an installed base of 100 systems worldwide and the 13,000th procedure performed with a Mazor system, we introduced at last month’s NASS annual meeting our new PRO solutions line to enhance the surgeon’s experience and evolving needs. The PRO line of solutions expands our capabilities, showcases our innovative heritage and furthers the partnership between Mazor and our customers. I was encouraged with the interest level in the PRO solutions line and we anticipate launching more PRO solutions throughout 2016.”

“We entered the fourth quarter with a robust pipeline and we have received orders for two systems in the quarter to date. We continue to have ongoing discussions with hospital administrators, the pipeline remains solid and we are reaffirming our confidence that Mazor will sell more Renaissance systems in second half compared to the first half of 2015,” concluded Mr. Hadomi.
