

## Mazor Robotics Announces Second Quarter 2013 Financial Results

– Global Revenue More than Doubles to \$6.2 Million; Recurring Revenue Increases 150% – U.S. Revenue Increases 77% to \$4.4 Million Gross Margin Expands to 80% Conference Call Today at 8:30 AM EST

CAESAREA, Israel – August 8, 2013 – Mazor Robotics Ltd. (TASE: MZOR; NASDAQCM: MZOR), the developer of Renaissance®, an innovative surgical guidance system and its complementary products, announced today its financial results for the second quarter ended June 30, 2013.

### MANAGEMENT’S COMMENTS

“Our strong financial performance, highlighted by the revenue increase and gross margin expansion, demonstrates continued global adoption of our Renaissance systems as we ended the second quarter with 54 systems installed globally,” commented Ori Hadomi, Chief Executive Officer. “A majority of the second quarter revenue increase came from the U.S market, which represents a significant growth opportunity for Mazor. Concurrently, we are also working closely with our global distribution partners outside of the U.S., and are encouraged by the early success in AsiaPacific, including India, Vietnam, Taiwan and Australia. Furthermore, the continued growth in recurring revenue, which increased 150% this past quarter compared to a year-ago quarter, reflects the increase in our install base and utilization, mainly in the U.S. markets.

In the second quarter, we received our first follow-on order from a major U.S. hospital corporation. This is a key achievement because it reflects a high customer satisfaction level from an organization that has the capacity to add many more systems into its hospital network. These systems are also being fully utilized in a wide variety of clinical applications – complex, MIS and open cases. It demonstrates the robustness of the technology further supporting the clinical and economic proposition.”
